

OLIGOPOLY COMMUNITY CHECKERS

SHOW UP. MAKE IT EQUAL. ÷

Sponsored by UNITED CITIZENS

UNITED CITIZENS WELCOME BOOKLET

A proposed three-level Community Checkers adventure of Identity,
Trade, and Gratitude

Welcome from Coach Tom

Showing up is the proof. Sharing is the strategy. Human choice determines what carries forward. ÷

Sponsored by United Citizens

Proposed Community Initiative | August 2026

Welcome, United Citizen

Thank you for showing up.

Your registered device—not your public name—is now recognized within Community Checkers. By completing one scan and accepting the Discord Gracebook guidelines, you have entered as a United Citizen. This is a voluntary community role, not a statement of nationality or legal citizenship.

You may participate, observe, or walk away. No response is treated as a character judgment.

The Detente 2030 strategy is simple

We gather in person.

Community Checkers comes to life through local LAUGH fulfillment events—Leaders Annual United Group Hug gatherings. These events give neighbors, friends, and strangers a place to meet, celebrate showing up, fulfill touchstone requests, and explore the Organized Krill spirit of sharing resources.

When available, MEGAvoters may celebrate acceptance of an Organized Krill kit and connect with a 30-member community. Acceptance is voluntary. The kit provides guidelines for cooperation. It does not create employment, surrender personal choice, or convert Experience Presence into money.

What your device represents

Your device helps recognize that an encounter happened without requiring your public name. It may record a device identifier, consent, selected role, timestamp, participation outcome, and applicable proof of presence.

It does not measure your worth.

XP means Experience Presence. XP expresses gratitude for sharing your time. It is never cash, wages, cryptocurrency, or a promise of payment.

Every choice remains yours.

Welcome to the Human Gold Rush. Welcome to Community Checkers. Welcome, United Citizen.

With gratitude,

Coach Tom Legacy to Live By Detente 2030 — Proposed Community Initiative

Your First Five Minutes

1. Confirm your device

One scan creates or recognizes your Community Checker device record. You are known in gameplay by the registered device identifier rather than a displayed public name.

Device recognition is privacy-conscious, but it is not a promise of absolute anonymity. Read the active privacy notice before accepting.

2. Read and accept the guidelines

Acceptance confirms that you understand the voluntary rules, the active entry door, and the separation between XP gratitude and real financial activity.

3. Choose your role

- Observe as a YAM'er: explore freely with no membership pledge.
- Participate as a MEGAvoter: make a proposed \$12 annual membership pledge. No membership payment is collected during gameplay.
- Walk away: leave without judgment.

4. Enter Discord Gracebook

When ready, accept the Discord Gracebook invitation and choose a Peace Pentagon branch. Discord is the proposed community and governance gathering place; it does not hold XP as money.

5. Watch for a LAUGH invitation

The online experience is only the beginning. A proposed local LAUGH fulfillment event is where people gather, touchstones may be fulfilled when available, and showing up becomes visible.

Scan. Choose. Gather. Recognize. ÷

The Three Doors

One registered device may approach three separate doors. The QR code that begins an encounter determines which door is active.

Identity — Who showed up?

The Identity door records device presence, consent, role, and the choice to participate, observe, or walk away. Identity does not create a purchase, payment, debt, wage, or tax event.

Trade — What was exchanged or promised?

The Trade door uses YAM-is-On to record proposed trade activity and applicable VFN financial records. Actual money activity, if any, stays in its own accounting and settlement system. Trade does not create XP.

Gratitude — Who recognized the moment?

The Gratitude door uses Seeking Gratitude to record Experience Presence, acceptance, rejection, attendance, and community surplus. XP is never cash, wages, cryptocurrency, an investment, or a redeemable balance.

The protection rule

One device. Three doors. Three separate records.

The three experiences may be compared for research, but their balances and meanings are never combined. To change doors, close the current encounter and begin a new scan.

LAUGH Events and Organized Krill

What is a LAUGH event?

LAUGH means Leaders Annual United Group Hug. A LAUGH fulfillment event is a proposed local gathering where United Citizens can meet, celebrate showing up, fulfill confirmed touchstone requests when supplies are available, and experience Community Checkers beyond the screen.

No cash payment is accepted during LAUGH gameplay or touchstone fulfillment.

What is Organized Krill?

Organized Krill is a proposed 30-member community structure for people who would rather share resources than behave like isolated, hoarding whales. Members may be observers, participants, buyers, recipients, sellers, or givers depending on the encounter.

An Organized Krill kit offers guidelines and tools for cooperation. Accepting a kit does not make anyone an employee, guarantee income, create an investment, or convert XP into money.

What happens at an acceptance celebration?

A celebration may include:

- Community introductions
- Practice FAITH touchstone fulfillment
- Organized Krill kit acceptance
- Peace Pentagon branch connections
- Device-based proof of presence
- Gratitude offered, accepted, declined, or directed to community surplus
- The continuing choice to participate, observe, or walk away

Event locations, hosts, dates, safety practices, accessibility, supplies, and fulfillment availability must be confirmed before attendance.

United Citizen Guidelines

These are voluntary gameplay and community-research guidelines. They are not employment, investment, banking, tax, or financial-advice terms.

Your choices

You may participate, observe, decline, dispute, or walk away. Silence and no-scan outcomes may be counted as research outcomes, but they are never treated as character judgments.

Practice FAITH

You are invited to practice FAITH by being Fair, Accepting, Insightful, Transparent, and Humble in relationships with others. FAITH is a voluntary covenant and behavioral aspiration, not a religious test or penalty system.

Protect the three doors

- Identity never creates a financial obligation.
- Trade never creates or converts XP.
- Gratitude never creates cash, wages, cryptocurrency, or an investment return.

Respect the record

Where used, the shared status path is:

Issued → Pending → Matured or Disputed → Reconciled → Extinguished

A disputed record matures into reconciliation. Reconciled does not mean everyone agreed; it means every position was accounted for. Extinguished means nothing remains actionable for that cycle while the append-only history remains preserved.

Keep humans responsible

AI systems may act as advisory clerks by comparing records and presenting recommendations. They may not invent consent, erase a dispute, move funds, convert XP into money, or make the final carry-forward choice.

Machines preserve the record. Consensus recommends. United Citizens choose.

Respect privacy and safety

Do not share another person's private information without permission. Follow the active privacy notice, community standards, event-host instructions, accessibility guidance, and safety procedures.

Proposed initiative notice

Oligopoly, Community Checkers, Detente 2030, LAUGH events, Organized Krill, Small Street Applied—Atlanta, and BIS 2.0 are proposed initiatives. References to churches, companies, organizations, academic institutions, or community partners do not imply affiliation, approval, sponsorship, or endorsement unless separately confirmed in writing.

The Oligopoly Objective

Oligopoly is a three-level Community Checkers adventure of Identity, Trade, and Gratitude—played through a registered device and completed by gathering with other people.

The objective is not to accumulate the most money or eliminate other players. The objective is to discover what happens when modern financial gameplay is observed beside something money cannot buy: human presence.

Identity establishes the encounter. Trade records the financial choice. Gratitude recognizes the human choice. The three levels may be compared, but their values are never combined.

Like a location-based mobile adventure, Oligopoly asks players to take their smartphones someplace people gather. The online record prepares the experience. A local LAUGH fulfillment event creates the real-world proof of presence.

Oligopoly asks a different question from a traditional financial board game:

Can a community measure wealth by what people share instead of only by what they store?

May 16, 2030 is proposed as a reconciliation and human-choice point. May 17, 2030 is proposed as the Detente 2030 and BIS 2.0 beginning. Eligible records may be reconciled, extinguished, or carried forward only under the rules and legal conditions applicable at that time.

The dot-over-equal symbol expresses the governing idea:

÷ means made equal through human acceptance.

The algorithm may explain what the recorded rules produce. Human beings decide what deserves to carry forward.

SHOWING UP. MAKE IT EQUAL. ÷
